

Reagent Information Sheet: Enhanced qPCR Master Mix (2X)

Usage Guidelines

The Enhanced qPCR Master Mix (2X) is a ready-to-use premixed solution optimized for real-time PCR (qPCR).

Reaction Setup

Table 1: Reaction Components

Component	Volume (μL)	Final Concentration
2X qPCR Master Mix	10	1X
Forward Primer	Variable	50 nM
Reverse Primer	Variable	50 nM
DNA Template	2	-
ddH ₂ O	Up to 20	-

Thermal Cycling Program

Choose the optimized thermal cycling program based on the specific primers, template type, and other experimental conditions.
